Projects

[Product QR Code Generator - Oracle Apex](#)

It matches with elements which is present in the database through the use of QR Camera
It contains some dynamic action, Some Process and button with QR scanner

[IPL 2008-20222 Analysis - Jupyter Notebook](#)

In this project, I Analyze data from the Indian Premier League (IPL), which can provide fascinating insights into team performance, player statistics, and various factors influencing match outcomes. EDA on data set involves analysis.

[Weather App - VS Code](#)

A Web Page that fetches weather data from a weather API based on the user's location or a user-inputted location. It displays the current weather conditions, temperature, and other relevant information.

Internships

[Oracle Apex Intern at Hindalco Industries](#)

I Learn Oracle Apex and I made some projects like QR Generator, Product Scanner, Analysis of Sales of Fashion Product and Basic Calculator

[Web Developer Intern at Prodigy InfoTech](#)

There I have created a diverse range of projects including a Weather App, Stop-Watch, Responsive Websites, Tic-Tac-Toe game, and Personal Portfolio website. In these projects I showcase the proficiency of HTML, CSS, and JavaScript.
